

Master of Data Science (MADS) - MDSc

CRICOS code (International applicants): 0101854

	On-campus	Online
Start:	Semester 1 (February) Semester 2 (July)	Semester 1 (February) Semester 2 (July) Semester 3 (November)
Campus:	Toowoomba	-
Fees:	Commonwealth supported place Domestic full fee paying place International full fee paying place	Commonwealth supported place Domestic full fee paying place International full fee paying place
Standard duration:	2 years full-time, 4 years part-time	

Notes:

In 2023 the program follows the Semester calendar. The [Academic Calendar and Important Dates](#) webpage will allow you to view and download a copy of the important dates for the Semester calendar.

Professional accreditation

Provisional accreditation of the Master of Data Science with the Australian Computer Society (ACS) is pending. Once provisional accreditation is approved, students will be eligible for ACS membership and recognition by ACS for certification.

Program aims

With the popularity of social media and the wide spread use of the Internet, enormous amounts of data of various types are generated at all times. The Master of Data Science is designed to provide an opportunity for graduates from all disciplines to gain advanced skills and knowledge in handling data more commonly known as Big Data, as well as producing and interpreting data analytics. The aim of this program is to provide students with a career path in Data Science and an opportunity for advancement in their career.

Program Rules

Students are required to:

- Satisfactorily complete 16 credit points as listed in the standard progression to graduate from the program.
- Satisfactorily complete all courses within 6 years.
- Maintain satisfactory academic achievement throughout the duration of the program, consistent with the [UniSQ Student Academic Progress Procedure](#).
- Meet the Inherent Requirements for the Master of Data Science.

Program objectives

On completion of the program students should be able to:

- Autonomously apply key ICT and data science professional knowledge, technologies and programming skills to critically investigate and analyse contemporary core issues in a global market, and to develop big data analysis and evidence-based decision-making skills.
- Select, adapt and apply specialised quantitative and technical skills to work independently and collaboratively to process and interpret major theories and concepts associated with big data to solve and interpret complex and real-life problems.
- Work under broad direction within a team environment, manage conflict, and take a leadership role for a task within the project.
- Apply and communicate ethical, legal, and professional standards related to big data privacy and building of a security culture, and assess and evaluate risks in order to comply with customer organisational requirements.
- Investigate, critically analyse, evaluate and communicate research findings and problem solutions associated with applied data theories and methodologies to specialist and non-specialist audiences.

Australian Qualifications Framework

The Australian Qualifications Framework (AQF) is a single national, comprehensive system of qualifications offered by higher education institutions (including universities), vocational education and training institutions and secondary schools. Each AQF qualification has a set of descriptors which define the type and complexity of knowledge, skills and application of knowledge and skills that a graduate who has been awarded that qualification has attained, and the typical volume of learning associated with that qualification type.

This program is at AQF Qualification Level 09. Graduates at this level will have specialised knowledge and skills for research, and/or professional practice and/or further learning.

The full set of levels criteria and qualification type descriptors can be found by visiting www.aqf.edu.au.

Admission requirements

To be eligible for admission, applicants must satisfy the following requirements:

- Completion of an Australian university three year Bachelor degree in any area, or equivalent OR
- A minimum of five years' professional work experience equivalent to a qualification at AQF Level 7.
- English Language Proficiency requirements for Category 2.

All students are required to satisfy the applicable [English language requirements](#).

If students do not meet the English language requirements they may apply to study a University-approved [English language program](#). On successful completion of the English language program, students may be admitted to an award program.

Inherent requirements

There are inherent requirements for this program that must be met in order to complete the program and graduate. Make sure you read and understand the [requirements](#) for this program online.

Program fees

Commonwealth supported place

A Commonwealth supported place is where the Australian Government makes a contribution towards the cost of a students' higher education and students pay a [student contribution amount](#), which varies depending on the courses undertaken. Students are able to calculate the fees for a particular course via the [Course Fee Schedules](#).

Commonwealth Supported students may be eligible to defer their fees through a Government loan called [HECS-HELP](#).

Domestic full fee paying place

Domestic full fee paying places are funded entirely through the full fees paid by the student. Full fees vary depending on the courses that are taken. Students are able to calculate the fees for a particular course via the [Course Fee Schedule](#)

Domestic full fee paying students may be eligible to defer their fees through a Government loan called [FEE-HELP](#) provided they meet the residency and citizenship requirements.

Australian citizens, Permanent Humanitarian Visa holders, Permanent Resident visa holders and New Zealand citizens who will be resident outside Australia for the duration of their program pay full tuition fees and are not eligible for [FEE-Help](#).

International full fee paying place

International students pay full fees. Full fees vary depending on the courses that are taken and whether they are studied on-campus, external or online. Students are able to calculate the fees for a particular course via the [Course Fee Schedules](#).

Program structure

The program consists of 16 units comprising of:

- 12 units of core ICT courses; or
- 12 units of core ICT courses for the Artificial Intelligence and Machine Learning specialisation; or
- 12 units of core ICT courses for the Data Analytics specialisation

- **And either:** 4 units of Research course; or
- 4 units of Research Training; or
- 4 units of elective courses (any Postgraduate courses, subject to pre-requisite satisfaction)

Research

Research dissertation courses as electives

Students wishing to pursue a PhD are encouraged to complete the research dissertation courses below as their electives.

Courses	Online	Toowoomba	Springfield
MSC6001 Research Project I ^{*#}	1,2	1,2	
MSC6002 Research Project II ^{*#}	1,2	1,2	

Footnotes

* Two-unit course

Subject to prior approval by Program Director

Research training courses as electives

Students wishing to pursue a research and development career are encouraged to complete the research training courses below as their elective.

Courses	Online	Toowoomba	Springfield
MSC6003 Industry Based Research Practice I ^{*#}	1	1,2	
MSC6004 Industry Based Research Practice II ^{*#}	2	2	
OR			
SCI6101 Science in Practice	1,2		

SCI6102 Research Skills	1,2		
SCI6103 Research Fundamentals and Ethics	1,2	1,2	
1 x Elective course			

Footnotes

* Two-unit course

Subject to prior approval by Program Director

Required time limits

Students have a maximum of six years to complete this program.

IT requirements

For information technology requirements please refer to the [minimum computing standards](#).

Articulation

Students completing the research project track within the Master of Data Science would be eligible to apply for articulation to the [Master of Research](#) or [Doctor of Philosophy](#) programs if they meet other requirements for entry into those programs. Students completing the research training track within the Master of Data Science with the appropriate GPA would be eligible to apply for enrolment in the [Master of Science \(Research\)](#) (Advanced) and then could progress (articulate) to a [Doctor of Philosophy](#) via that route once they have demonstrated satisfactory progress in a significant research component.

Exit points

Students may exit with the [Graduate Diploma of Science \(Applied Data Science\)](#) on successful completion of at least eight courses within the Master of Data Science if they have satisfied the requirements of a [Graduate Diploma of Science \(Applied Data Science\)](#). Students may exit with the [Graduate Diploma of Science \(General\)](#) if they have completed at least eight courses from the Master of Data Science, including four post-graduate courses coded at 5000 level or above.

Students may exit with the [Graduate Certificate of Science \(Applied Data Science\)](#) on successful completion of at least four courses within the Master of Data Science if they have satisfied the requirements of a [GCSC Graduate Certificate of Science \(Applied Data Science\)](#). Students may exit with the [Graduate Certificate of Science \(General\)](#) if they have completed at least four courses from the Master of Data Science, including at least two courses coded at 5000 level or above.

Credit

Exemptions/credit for all specialisations will be assessed according to [UniSQ procedure](#).

- Up to **four** units of coursework exemptions or credit will be granted if the student has completed courses equivalent to courses offered in the Master of Data Science in either:
 - UniSQ's [Graduate Certificate of Science](#); or
 - A Graduate Diploma or Bachelor's Honours Degree qualification in a discipline different from the current area of study.
- Up to **eight** units of coursework credit or exemptions will be granted if the student has completed courses equivalent to courses offered in the Master of Data Science in either:
 - UniSQ's [Graduate Diploma of Science](#); or
 - A Graduate Diploma or Bachelor's Honours Degree qualification in a discipline equivalent to the current area of study.

Notes:

- All requests for credits or exemptions need to be sought by the student and approved by the Program Director.
- The Program Director will deem to what extent prior studies are equivalent.

Enrolment

Recommended Enrolment Pattern - Full-time (4 Semesters, S1 entry) - Enterprise Data Science

Students are able to enrol in any offered mode of a course (on-campus, external or online), regardless of the program mode of study they enrolled in.

Students may, with approval of the Program Director and acceptance by an appropriate supervisor, elect to replace two or four units of research training courses ([SCI16101 Science in Practice](#), [SCI16102 Research Skills](#), [SCI16103 Research Fundamentals and Ethics](#) and/or 1 approved course) with one or two 2-unit research project courses ([MSC6001 Research Project I](#) and [MSC6002 Research Project II](#)) or ([MSC6003 Industry Based Research Practice I](#) and [MSC6004 Industry Based Research Practice II](#)).

MSC6004 Industry Based Research Practice II *	2	2			2	2	Pre-requisite: MSC8003 or MSC6003

Footnotes

^ First offer S2 2023

* Commencing 2024

Recommended Enrolment Pattern - Full-time (4 Semesters, S2 entry) - Artificial Intelligence and Machine Learning

Students are able to enrol in any offered mode of a course (on-campus, external or online), regardless of the program mode of study they enrolled in.

Students may, with approval of the Program Director and acceptance by an appropriate supervisor, elect to replace two or four units of research training courses ([SCI6101 Science in Practice](#), [SCI6102 Research Skills](#), [SCI6103 Research Fundamentals and Ethics](#) and/or 1 approved course) with one or two 2-unit research project courses ([MSC6001 Research Project I](#) and [MSC6002 Research Project II](#)) or ([MSC6003 Industry Based Research Practice I](#) and [MSC6004 Industry Based Research Practice II](#)).

Course	Year of program and semester in which course is normally studied						Enrolment requirements
